First name: Dr. C. M.

Last name: Pyle

Organization:

Title:

Comments: Electric Bikes are silent and fast. They can injure people on city streets, and they can injure hikers on wilderness paths. They can also disrupt the normal comings and goings of the residents of that wilderness: Other Animals. Other Animals have just as much right to this globe as Human Animals do. The United States Forest Service exists to PROTECT WILDERNESS, not to destroy it or its inhabitants. Fulfill that obligation, please!
