Title:

Comments: Please do NOT allow e-bikes or mountain bikes in the wilderness. Wilderness was created to save some places that would be untrammled by humans. we need to protect wilderness so it's only accessible at the speed of walking (horse or human). Anything faster than the speed of walking denigrates the quiet, peaceful quality of what wilderness is all about. Besides, it can startle wildlife as well as walkers who are meditating. Do NOT allow bikes of any kind in wilderness areas.
