Comments: Please do not allow e-bikes to be used in national forests and public lands. I enjoy the beauty and serenity for these areas when I use them. The lack of noise is a mental health break for me and millions of others. Since my taxes help pay for the care of these precious public places, I would be very upset to lose a major benefit to my health in them.

No e-bikes in national forests and public lands, please. Thank you for your consideration.
