Title:

Comments: As a wilderness hiker and camper I find this plan to allow E-bikes in wilderness egregious. The blessing of silence while enjoying a hike is desirable.

Such bikes will grate on hikers' ears as much as the neighbor's motorcycle repaid did this past week. I was ready to go to the manager and demand the tenant be evicted.

Wildlife will no doubt be disturbed and have their habitat diminished by the noise of bike motors. We have already lost innumerable animals in the West due to fires and in the East due to flooding and hurricanes.

NO MORE DESTRUCTION OF WILDLIFE HABITATS, especially by bike motors.
