Title:

Comments: Please keep current restrictions at our national parks and wilderness areas which regards bikes the same as motor vehicles for access. Do not allow bikes into the wilderness as this is disruptive to the wildlife, the wilderness itself and the peace and serenity it provides and is so desperately needed by all! We must preserve every bit of nature that we are humanly able to! This preservation is vital for all living things!!! Do not allow bikes in areas that currently ban vehicles! Thank you!
