Comments: I urge you to REMOVE-WITHDRAW any proposed changes that would allow use of the e-bike on trails in our National Forests. This proposal has huge implications for damage to wildlands, wildlife, and Wilderness areas set aside for protection. I am against facilitating ease for e-bike usage to create damage, including to wildlife and the environment itself. The forests are places where I've often gone to seek the peace and quiet and slow pace of nature, as many do. It is not a place to add the disturbance, damage, noise, etc. of fast-moving e-bikes.

Please leave our forests alone. The nation needs wild places of peace.
