Comments: As an electric bike (e-bike) rider I strongly believe that e-bikes should not be allowed to be used in National Forests. E-bikes go much faster than most people are able to ride a conventional bike and will interfere with non-motorized trail users such as hikers, bikers, horseback riders. E-bikes also can travel much further quickly than than hikers and bikers and are likely to startle and disrupt wildlife that is less intruded upon now. Please do not allow e-bikes of any class in National Forests.
