Comments: I oppose the Forest Service's proposed rule to open up National Forest lands to e-bikes. E-bikes are motorized so they should not be allowed on any trails designated as only open for non-motorized use. My personal reason is that I am an equestrian and mulepacker and my animals do not react well to anything sneaking up on them from behind! With so many trails now open to mountain bikes, I often feel unsafe to take my animals many places. So many people have no idea who has the right of way or what is the proper behavior around horses and mules -- let's not make it worse!
