Comments: I do not support allowing e-bikes in non motorized trails. That is the whole idea of a non motorized trail ....to have an area that is not disturbed by a vehicle moving thru the forest at a rate that will disturb the animals and the flora and the peace that hikers enjoy. there are plenty of motorized trial for them to enjoy. It is only right for some trails to be saved for those walkers/hikers to enjoy without having to be aware of getting out of the way of fast moving e-bikes. Please lets save the non-motorized areas and keep them non-motorized brcause e-bikes are definitely motorized. thank you
