Comments: Dear USFS,

I would like to let you know that I'm against e-bikes on anywhere but on trails designated for OHV's. E-bikes do not belong on trails Open to bicycles or cross country.

In the future, I see battery technology evolving to the point where the current crop of gas powered 4 Wheelers, side by sides, and motorcycles will be able to cruise all day on a single charge. My observations over the past 20 years is that the 4 wheeler crowd could care less about the environmental damage they cause. Most dispersed camping areas I've been to in Idaho are dust/ mud bowls due to 4 wheelers etc...

If allowed, e-bikes will open the path for future unrestricted e- vehicle use on USFS and BLM lands.
