Comments: I am in support of the 3 classifications for emtbs. I am also in support of allowing class 1 emtbs on the same trails as regular mt bikes. I personally know several older people with physical issues that would not be able to continue mt biking without the support of an emtb. All of these people ride at an equal or slower pace than their riding friends on regular mt bikes and are regularly passed by riders going faster on regular mt bikes.

Excessive speed is not an issue with the emtb riders that I know. If speed is deemed to be an issue, then it should be an issue with both regular mt bikes and emtbs, and a speed limit should be posted.
