Comments: I strongly oppose the Forest Service's proposed rule to open up my National Forest lands to additional e-bike use for the following reasons:

E-bikes must continue to be treated as motor vehicles, not bicycles. New e-bikes are being developed now that will drive up to 55 mph. E-bikes must travel only where motor vehicles are allowed!

This proposed rule suggests likely environmental impacts that should be fully evaluated through an environmental impact statement (EIS) under the National Environmental Policy Act (NEPA).

The proposed rule appears to set up conflicts with the Forest Service's Travel Management Rule (36 CFR 212 et seq).

Because of their speed and quiet nature, e-bikes can travel much farther into the backcountry, and therefore would be able to startle and disturb wildlife over far greater distances. E-bikes also inappropriately and unfairly conflict with other nonmotorized trail users like hikers, horseback riders, and bicyclists.

Because there is almost no enforcement now for trespass, illegal off-trail riding, and illegal trail development by some bikers, e-bikes will increasingly trespass into Wilderness and other protected areas with no consequences. This illegal use will degrade the wild character of these lands and should not be encouraged as this rule will do. I feel sure you are aware of this and would agree that we need to take the utmost care to protect and conserve these precious environmental resources, for their own sake and for our human wellbeing.

The Forest Service should withdraw this proposal.

Thank you very much.
