First name: Lela

Last name: Florel

Organization: Preserve Remington Woods

Title: Founder

Comments: E bikes should not be used in park lands, or wilderness areas. The areas that are for forest communities, and other areas where wildlife could exist, are dwindling. They are increasingly compromised and now damaged by climate change, fires, floods, storms. Wildlife populations are plummeting, biodiversity is being lost, there are mass extinctions. We need to rewild in order to fight climate change and save diversity, not find new ways to further degrade Nature.

An extremely large percent of people go to Natural places for peace, renewal, re connection, healing, exercise, beauty, to take advantage of what only an intact living natural community of plants and animals can offer, and to view wildlife. Vehicles of any kind brutally interrupt that experience as well as having a devastating effect on the habitat and wildlife, who have no where else to go. We have a vast system of roadways for vehicles. We must preserve our Natural spaces intact, respecting what they are, and not destroy them.
