Comments: E-bikes are necessary to the aging population that wants to continue bicycling like ME! I am opposed to bikes that do 55 MPH PERIOD. Those are STREET bikes, not trail bikes. What trails have done in Florida is prohibit MOTOR bikes from all trails but allow E-BIKES to use Rail to Trails at a max speed of 20mph. The national parks could allow the same, and e-bikes are MUCH QUIETER AND SAFER than the snow mobiles they allow in national parks.

There are types of E-bikes. If the forest service limits use to type 1 e-bikes, these do not go over 20mph. I own one of these. I would never consider allowing a 55 mph e-bike in any national forest or park.
