Comments: I am opposed to E-Bike use of non-motorized trails. I am an avid hiker and spend a great deal of time hiking trails on USFS lands. E-Bikes do not belong on foot trails - they disturb the wilderness quality, they degrade the trails, and they are dangerous to fellow trail users who travel by foot. A great deal of effort has gone in to developing foot-traffic-only hiking trails over many years, and many people have worked hard to make these peaceful, quiet trails available. Let the e-bike folks establish their own trails, or confine their use to roadways.
