First name: Cristine

Last name: Maize

Organization:

Title:

Comments: In addition to the "obvious" (disturbing wildlife, noise pollution, environmental concerns), please consider the DANGER to wildlife and animals! Even riders on regular bikes go way too fast and jeopardize the health and safety of pedestrians...how much worse will it be with electric bikes? In addition, the vast majority of Americans are overweight or obese...why contribute to this epidemic by allowing yet another "Lazy" option to avoid actual healthful movement and exercise?!?
