Last name: Larsen

Organization:

Title:

Comments: Please document this ability to use our public lands but do not regulate it.

In the end these are just mountain bikes that allow the fit to get further into non-motorized areas and the disabled to use it for the first time.

My wife had major back surgery 10 years ago. Because of that she can not hike or ride horses, these bikes open a door for her and others like her. Please remember that in your decisions.

As for those opposed to ebikes. We are all part of the public land club. You do not get to exclude the disabled just because you do not like a wheelchair ramp to get to the club. We all have members of our club that annoy us how they use it. Mountain bikes, equestrian, backpacking, off-roading, etc.. We all have the right to use it, This is just one more option.
