Comments: NO!!!! NO!!!! NO!!!! Absolutely NO to e-bikes or any other motorized technology vehicles in our National Forests and Wildlife Refuges!!!

I am absolutely and unalterable opposed to any motorized bike or other 'vehicle', including any electric motor bikes or whatever of the future ever being allowed in our National Forests!!!!

Defining or creating an e-bike definition and adopting the three classes of e-bikes for designation as motor vehicles is just so much gibberish to cover the abomination of allowing those things in our forests! NO!!!

Right now just regular human leg powered mountain bikes are DANGEROUS enough to humans on foot and to wildlife!!!! If mountain bikes are a threat---which they are the way they are ridden at breakneck speed by speed/sport crazed humans---e-bikes could be a worse threat to killing wildlife and humans on foot that get in their path!!!!

I know firsthand what a physical threat existing mountain bike riders currently are, because I am a semi-handicapped septuagenarian who walks slowly with canes and CANNOT jump out of the way of craze bikers!!!! I believe even those human powered bikes currently allowed should be banned!!!!!!

Under NO circumstances should e-bikes or any motor powered vehicle ever be allowed!!!! NEVER!!!! NO WAY!!!! NO e-bikes!!!!

There must be NO motorized e-bikes or anything else in our National Forests!!!!
NEVER ANY kind of e-bike or other motorize "thing" ever allowed!!!!

I am absolutely and unalterable opposed to any motorized, including electric motor bikes ever being allowed in our National Forests!!!!
