Title:

Comments: I oppose opening up additional National Forest lands for e-bike use.

E-bikes are motorized vehicles that can reach high speeds and are not appropriate for use on most trails that are traveled by non-motorized users such as hikers and horses. An environmental impact statement should be done before rules are changed to allow E-bikes on trails.

In addition, increased E-bike use could severely impact surrounding areas that E-bikes provide greater access to and could result in damage to sensitive areas.

Please do not go forward with this proposal.
