Title:

Comments: E-Bikes are motorized vehicles!

They have no business being in protected areas where wildlife live and are protected. If you open up National Parks to E-Bikes, then open up the trails so I can take my dog hiking with me at these beautiful places.

E-bikes should only be allowed access where you allow cars, trucks and buses.

I come to the parks to enjoy the peace and beauty provided by nature.

To get away from all the noise and traffic of the masses.

National and State Parks are sacred!

People can not be trusted to honor, respect and protect these fragile areas.

That is why you have the rules/laws to protect these places.

Vehicles are destructive to the landscape and terrorize the natural inhabitants of the area. More so than dogs.

And dogs can get pretty vicious. And so can people. Especially the ones who have no respect for themselves, let alone anyone or anything else.

Please continue to protect our National and State Monuments from this craziness.

Please consider adding more staff to enforce the rules/laws to protect these parks and wildlife before they no longer exist.
