Comments: I do not think allowing e-bikes in National Forests is a good idea. As stated, it would disturb the wildlife greatly. They LIVE there for heavens sake!! We visit there home and should be respectful always. Researchers know that loud noise is one of the reasons for fear arising in animals and humans. I know that when I go to a forest, what I am looking for is quiet except for birdsong and wind through the trees. Please ban these e-bikes from National Forests. Please do it now.
