First name: Peter

Last name: Rogan

Organization: Ropeja, Inc.

Title:

Comments: A set of vehicles capable of reaching powered speeds of 55 mph is not wanted or needed in wilderness areas. We ought not to encourage people to treat wilderness areas as wastelands they can despoil, entrench, depopulate and deforest as they will. That's not what wilderness is for, and it is not what our wilderness policy should be. Nor should it be what our wilderness policy should be. We must not permit electric bicycles and the damage they cause in America's wilderness.
