Comments: I am opposed to allowing electric bikes on more wilderness trails on our public lands. Their ability to go faster and further than mountain bikes will be more disturbing to wildlife and other trail users like myself, a hiker and bird-watcher. Even if electric bikes are initially considered motor vehicles, I fear they will be eventually allowed on wilderness trails.

Please! Let's do something that is good for the wildlife and the environment rather than good for a few humans. Keep electric bikes out of our public wilderness areas.
