Comments: No way should there be any e-bikes allowed on the Federal lands. The tracks, the smell from the exhaust and whatever else might make make the lands unusable because of bike use should be prohibited. If you allow bikes to use these lands, I'm sure you can expect problems. I don't like being a pessimist, but I know what these bikes and their riders can do without thinking about it at all. Specific road ways might work, but there needs to be caution!
