Comments: I do not condone or want e-bikes on any forest trails where I may be hiking. I hike in forest areas for the peacefulness of being away from urban zones and the only sounds I want to hear when hiking are those of nature. E-bikes do not emit sounds of nature. They are noisy, move much faster than hikers and pack animals, thus inviting injuries or worse, and scare forest life from their normal activities. I oppose permitting e-bikes on National forest trails.
