Last name: Roda

Organization:

Title:

Comments: Even though I am an enthusiastic supporter of 3-bikes on roads and suitable streets, I am definitely NOT a supporter of e-bikes in wilderness areas or other sensitive forested areas where they can degrade the environment and harm or otherwise disturb wildlife in these areas. They can also come into conflict with nonmotorized trail users, like hikers, horseback riders, and non-motorized bikes.

Our wilderness is a precious part of our environment and critical for the survival of trees, other plants, and animals. It also is one of the few places humans can go for relief from the noises and speed of life in towns and cities.

Please withdraw this proposal.
