Comments: Do not allow e-bikes on anything except trails and roads already open to motorized vehicles. The basic problem is that because they can travel at speeds of up to 55MPH they become, in effect, weapons. E-bike user might say they want to share the trails, but what they want to do is take them over and relegate every other user to secondary status, which they would enjoy. There are enough places that the e-bikers can get their speed rush without giving them any more hiking trails
