Comments: I totally support allowing class 1 e-bikes on all trails where mountain bikes are allowed. This is very important to give greater access to people who need the little boost provided by a 1 e bike on the trail. My husband has an ebike and I would like to ride together in the National Forest. Supporting this change is positive to support exercise in the out of doors. As folks, get older this may not be possible without using an e-bike.

I would also be in favor of allowing class 2 e-bikes and class 3 e-bikes on existing motorized trails and roads but not allowing them on trails where mountain bikes are currently allowed.
