Comments: To me E-Bikes are basically slow Motorcycle's, and still have the ability to tear up trails. And I would appreciate it if they would stay off non electric bike trails and hiking trails to maintain the quality of the trails. Plus, with the ability of advanced speeds uphill, I've personally had instances of people blowing past me without warning, and almost hit me. I understand the need for them for some people, but they should be kept on separate trails. And not allowed on all trails.
