Comments: E-bikes should not, & MUST NOT, be allowed to degrade trails, disturb wildlife, the serenity of the environment OR proceed as ANY thing other than a MOTORIZED vehicle, WHICH THEY ARE!

Wild places need to be left in peace, in quiet, in healthy, wild wholeness. They are NOT amusement parks for us to imbue w/our noise & other pollutions. They were, & are, designated as WILD for the safety, benefit & sanity of ALL of us, including the non-human inhabitants of these sacred spaces.

We think we have to right to possess & use up all & everything. Well, we don't. It isn't healthy &, therefore, isn't wise. If we don't preserve even the fractions of our planet that are still pristine & as they should be, our own pleasures & needs for peace, quiet, solitude, restoration & communion, as well as the health of our only environmental home, WILL be sacrificed. What's next? Motorized skateboards? Motorized scooters. NO MOTORS should be allowed in our sacred places~ it's for the health of ALL of us.
