Comments: eBikes have allowed my wife to enjoy trails with me. She has physical limitations that create tremendous pain when hiking. Her fitness decreased because of these limitations. The eBike has gotten her back outdoors enjoying our great landscapes.

Two weeks ago we visited the Little Grand Canyon near Castle Dale, UT. She thoroughly enjoyed her sight seeing ride. No users were upset about her eBike and we only had great interactions with all users.

I've had very few interactions where an eBiker lacked proper trail etiquette. They are simply having a fun time outdoors enjoying the scenery and getting exercise to boot.

I understand there will probably be criteria that limits eBike access. Did not see anything in the documents. I would hope you will allow eBike access on most trails.

Please allow eBikes on trails.

Thanks
