Comments:

Mountain Bikes, Off Road Vehicles, Motorcycles, are not allowed at anytime.

This is a very unsound idea as it will touch the forest in a very negative way. Much of our forest land is being destroyed through forest fire some caused from lightning strikes. At some point in the future batteries will be found discarded leaking, just a matter of time We are just destroying the forest lands.

California's wildlife that has not burned up in the fires is struggling to survive. I urge you to reconsider this plan,

find a new home.
