Comments: To all those concerned with our National Forests:

I strongly disapprove of allowing any type of e-bike to be ridden in any of our National Forests. The noise, speed and fumes of an e-bike are not natural to a forest where animals and hikers exist quietly and respectfully of each without disturbing the peace and harmony of the environment. Our National Forests, Parks, and public lands are steadily being encroached upon, and allowing e-bikes to be ridden in a National Forest is a clear example of this encroachment.

We do not have endless public lands and National Forests in this country and we need to respect and protect what we have!
