Title:

Comments: Protect our natural forests and wilderness. There is no need for e-bikes on trails designated for non-motorized vehicles. I am a hiker who takes only photos and leaves only footprints. Encountering any vehicle on a quiet hike in Pisgah forest is appalling. Why? Why do this? For whom? The cons far outweigh the pros. Climate disruption is already stressing the forests. I can feel it among the trees every time I enter the wood. Keep these e-bikes off the trails.
