Last name: Jones

Organization:

Title:

Comments: As a young man I spent considerable time hiking the National Forests in Southwestern Montana. Now I am 70years old. Hiking is seemingly more strenuous now. So I have undertaken riding a Class 1 e-bike much to my delight. I travel some of my old haunts, but I have restricted my riding to those trails that are open to motorized travel. This small limitation reduces the impact on those other non-motorized trails that have provided solace to many of us humans. Enjoy your e-bike experience with respect for the natural environment.
