Comments: Re: ebike use. I ride an ebike because I have a knee issue. It is pedal assisted . I feel pedal assisted ebikes should be allowed on bicycle trails. I ride on both roads and trails and have been passed by people on bicycles. My bike will only go up to 20mph. I know the trend appears to be faster and faster ebikes capable of keeping up with standard motorized dirt and road bike. Those much faster bikes should not be on hiking or bicycle trails. I'm 67 and have ridden bikes since I was about 5 years old. The ebike I own, now allows me to ride again! Please consider us older folks that love To ride.
