Comments: I oppose the Forest Service's proposed rule to open up my National Forest lands to additional e-bike use for the following reasons:

- E-bikes must continue to be treated as motor vehicles, not bicycles. New e-bikes are being developed now that will drive up to 55 mph. E-bikes must travel only where motor vehicles are allowed.

- because there is almost no enforcement now for trespass, illegal off-trail riding, and illegal trail development by some bikers, e-bikes will increasingly trespass into Wilderness and other protected areas with no consequences. This illegal use will degrade the wild character of these lands and should not be encouraged as this rule will do.

- Because of their speed and quiet nature, e-bikes can travel much farther into the backcountry, and startle and disturb wildlife over far greater distances. E-bikes also conflict with other nonmotorized trail users like hikers, horseback riders, and bicyclists.

- E bikes have no place in the wilderness, just like all other motorized versions of transportation. The forest service should withdraw this proposal. Thank you.
