Comments: A bicycle with a motor is a motorcycle, thus a motor vehicle. An e-bike is a bicycle with a motor.

Motor vehicles should NOT be allowed on trails used by hikers, equestrians and mountain bikes, as they are not compatible with such use. I offer these comments as someone who has been a cyclist for 65 years, including many years of mountain biking in the national forests. By the way, if anyone is arguing that e-bikes are not motor vehicles because their motor is electric, ask them how they plan to cope with the Teslas and Bolts on our trails; these would also not be motor vehicles under their reasoning!
