Comments:

To Whom it may concern:

National Parks are for us to enjoy the natural beauty that God created, not to turn it into some kind of hunting resort, a recreation of destroying nature with motorcycles, bicycles destroying and disturbing wildlife animals home with noise pollution and destroying trees and bushes. The parks are to be peaceful and quiet and a time for people to getaway and relax from the craziness of the world. Please rethink about what you are doing, don't allow Trump to poison your mind by destroying our beautiful land areas.
