Title:

Comments: I am OPPOSED to any e-bike use on any public land, including our national forests, except on paved roads. E-bikes are essentially electric motorcycles, and because of their ability to travel at higher speeds they cause much more erosion, disturb wildlife, and also disturb other users of public lands because e-bike operators are usually disrespectful of non-e-bike users (the same is true of mountain bikers). E-bikes should not be allowed on trails and unpaved roads on public lands.
