Comments: No motorized/E bikes should be allowed on any National/State/local trails in any forests/parks. By virtue of being motorized, they should be required to stay on paved/dirt roads only, and/or very limited areas specific to their function and recognizing their speed. Motorized bikes should not be allowed on trails that hikers, runners, mountain bikers and nature seekers enjoy. The potential for conflicts/destruction to natural environments and wildlife is too great a risk. We cannot afford to lose more forests/national park space, the damage cannot be undone.
