Comments: The e-bike, no matter how fast it can go, is NOT powered by people when using the electric supply part of the bike. Unless a vehicle is run by only people-power, they should always be classified as a motorized vehicle, and therefore should not be allowed to go on hiking trails/paths. The disruption of wildlife environments, erosion of trails, and the increased potential of people and natural resources to be hurt and/or damaged should substantiate the further prohibiting of e-bikes.
