Title:

Comments: I have really bad asthma. I can no longer ride a regular bike but my doctors recommend that I keep my body as fit as possible so that it uses oxygen more efficiently. My ebike has prolonged my life. It is much slower downhill than my old trail bike because of the weight and uphill is as fast as some of my friends that are in good shape. I really do not see the harm in allowing ebikes especially if it prolongs your riding life.
