First name: Brant

Last name: Ringler

Organization:

Title:

Comments: I oppose the Forest Service's proposed rule to open up my National Forest lands to additional e-bikes as they will further assist in destroying nature. They will go deeper into the forests (unmonitored) and disturb habitats. This is just another form of a motor vehicle and who knows what will be next, so stop it now before it gets worse. At a minimum, a NEPA study needs to be done before any form of approval.
