Title:

Comments: I am 90 and no longer hike in the National Forests, but have a long history of enjoying both short and long trails. I can't believe that the Forest Service would contemplate allowing ebikes on our trails. Perhaps the decision makers should leave their desks and offices for a few days and try out some trails and imagine what it would be like to have an ebike come along. It does not blend in with the peaceful atmosphere of our Forest trails. It does not belong there. Please don't allow these mechanical things on our trails.
