Title:

Comments: Class 1 e-bikes should be considered the exact same as a regular mountain bike. They do no more damage and in many cases they carry a consistant speed so do less damage. Class 2 with a throttle should be the same as class 1 if governd to 20 miles per hr. Class three with throttle above 20 miles an hr would be motorized. Trying to make it difficult to classify, will be hard to control and only create conflict between users.
