Comments: I don't believe eBikes should be allowed on the same trails as regular mountain bikes. eBikes have a motor and act more like motorcycles than mountain bikes. If you break up the classes of eBikes then enforcement of the rules becomes more difficult. The bottom line is regardless of how much the eBike motor assists the rider, there is still a motor assist. eBikes should be limited to the same trails as motorcycles only. I would add there is already enough trail conflict between mountain bikes and hikers and equestrians, and added more users on eBikes will only increase that conflict.
