Comments: I am very much in SUPPORT of the use of E-Bikes in the national forests. We need to remember that the forests are protected so that all people can access and enjoy the outdoors. E-Bikes create access for a much broader segment of the population and as we are nearing a record high number of retirees and baby boomers entering a time in their lives when they have time to explore and enjoy the outdoors, we should be encouraging and supporting access to the national forests. I am also an avid hiker, trail runner and cross country skier - these trails should be shared for all of these activities; e-bikes should be welcome in the National Forests. Thank you for pursuing this; the more people we get outside enjoying nature, the better the world becomes for all of us.
