Comments: I am writing to support classification of all eMTB's as motorized vehicles, and to oppose classification of current mountain bike accessible trails as motorized.

I feel that non-assisted mountain bikes are sufficient to experience and enjoy the vast majority of wilderness trails. And I expect that de-restricting eMTB use will increase eMTB adoption by users that tend to respect trails and our environment less. I also have little faith that legislation to increase trail support and advocacy will be created, and I expect that eMTBers generally give already under-supported traditional mountain bike riders a bad name.
