Comments: I think own a Class 1 ebike and feel they should be allowed on non-motorized trails the same as regular bikes. I currently have to ride on motorized trails with motorcycles who can attain speeds of 40 to 60 miles an hour while my pedal assist bike is lucky to make 15 to 20. It creates a very dangerous situation.

Hopefully you will consider that these are regular bicycles that are heavier and require the pedals to be turned by the user to get any assist.
